Feature's of online grocery store management system

1.Payment Gateway Integration: Secure online payment options, supporting various methods like credit cards, digital wallets, and other popular payment options.
2.Shopping Cart: A user-friendly interface for customers to add/remove items, view the total cost, and proceed to checkout.

3.Product Management: Efficient tools to add, update, and manage product listings, including details like price,

description, and availability.

4.Promotions and Discounts: Capability to apply and manage discounts, promotions, and coupon codes to attract and retain customers.
